**How this scheme of work links to school vision and values (wellbeing, independence, communication, achievement):**

**Curriculum Intent:**

The table tennis module follows on from ball skills module so that the students can continue to develop their hand-eye coordination and object manipulation. The students will use the table tennis module to continue practising their throwing, catching and bouncing - with an additional fundamental movement skill being added – the forehand strike.

The table tennis module complies with the Covid-19 PE risk assessment and will follow normal safety procedures, to look after the health and wellbeing of students.

Students will work in pairs/teams to develop their communication skills; they will also take on leadership roles of umpire, score keeper and in some cases – coach.

Throughout the module, the students will be encouraged to take ownership of their learning with opportunities for independent work (where appropriate). The students will be able to track their progress through the skills via a visual board set up in the hall. Homework learning will look to develop key vocabulary and understanding.
